- // Face entry
- // IP44
- // 3000K available
- // CRI>80
- // 5-year warranty

Construction

Our Compass luminaire has been specifically designed for use in vulnerable areas where safety and anti-ligature lighting is required. The luminaire body is manufactured using 1.2mm steel. The diffuser is manufactured using impact-resistant polycarbonate.

For installation and maintenance, there is a face entry access to ensure paint/anti-pick mastic is not disturbed after installation.

As standard, the luminaire utilises branded electronic control gear which is mounted on a white powder-coated metal gear tray.

Product Code	LED Wattage	Lumen Output	Lumen/Watt	Colour Temperature
COM14LDE	16W	1973	127	4000K
