

HALO RECESSED TRIMLESS

Construction

The Halo Trimless is designed to be recessed in to ceilings. Available in 5 different sizes and a wide variety of RAL colours. It is the ideal option when lighting a large open space or simply wanting to create a stunning feature. The versatility of the aluminium body and LED technology used allows for inclusion of many control options including dimming, emergency options, wireless switching and scene setting eBlue technology.

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Retail Units, Bars, Restaurants, Hotels and Leisure Facilities and Residential Properties.
