LIGHTING THE WAY

WHY MOUNT LIGHTING?

Mount Lighting is a family-owned commercial lighting manufacturer that has been established for over 20 years. Our high-quality range of LED lighting has been curated for the commercial interiors market. With our combined technical expertise, creative lighting design, and flexibility for providing bespoke products, you will receive impeccable service from design concept through to delivery and aftersales support. We are renowned as lighting solution providers, not just manufacturers.

OUR MISSION

Our mission is to make the entire process of specification, manufacture and delivery of commercial lighting frictionless for you. Our ability to analyse the project from a design to installation perspective is second to none. We make the process easy and seamless, just send us your design brief and we will produce full lighting calculations, schedules and drawings as required.

WHO DO WE WORK WITH?

Electrical Contractors

We are passionate about helping electrical contractors deliver projects on time and on budget. We take projects from the design stage through to completion and ensure all details are realised beyond satisfaction.

Electrical Wholesalers

Mount Lighting has a reputation for being the commercial lighting supplier of choice for our enviable technical knowledge and expertise in lighting controls.

Architects and Designers

Perfect illumination should be at the heart of every good interior design project. That's why we work alongside architects and interior designers to ensure the creative vision is realised.

Interior Contractors

Our team are a creative bunch with a wealth of experience in the commercial interior and fit-out sector. Our service includes the provision of site visits and lighting designs, helping you bring your project to light.

OPTION CODES EXPLAINED

HZN14LDE

Main Product Code

Denotes standard luminaire part no.

/MZ

Emergency Options

Add to part code for standard emergency types
/M = 3 Hour Maintained
/NM = 3 Hour Non-Maintained Emergency
/MZ = 3 Hour Maintained DALI Emergency
/ST = Self-Test Emergency

Other types are available, please call to discuss your requirements

/PCF

Detection Options

Add to part code for detection control options
/P = Presence Detection
/PCF = Dimmable Presence Detection
/PH = Photocell Dusk to Dawn

/DALI

Dimming Options

Add to part code for standard dimming options
 Denotes the type of dimming required.
/D = 1-10V Dimmable Driver
/DALI = DALI/DSI Dimmable Driver
/TD = Mains Dimming
/BTC = Casambi Dimmable

3K/4K/5K

Colour Temperature

IP20/54/65

Ingress Protection (IP) Rating

/TAMAR

Trim and Colour Options

Add to part code for additional trim or specific colour, please see sections for details as this is very specific per section

/ALR

Legend Options

(only applicable to emergency exit signs)

/AD = Arrow Down
/ALR = Arrow Left/ Right
/AL = Arrow Left
/AR = Arrow Right
/AU = Arrow Up

DELIVERY OPTIONS

Call & Collect

We offer a call and collect service to our clients. Simply contact us to find out if we have stock of the products you want, place your order and collect same day. Please allow 1 hour from placing your order for collection.

Same-Day Delivery

For those urgent orders we can offer a same-day delivery or collection service in the local area. This service is normally chargeable, please enquire. Our cut off time for this service is 1PM.

Next-Day Delivery

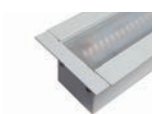

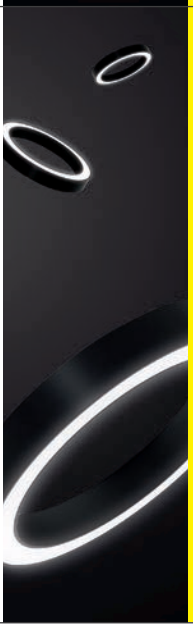

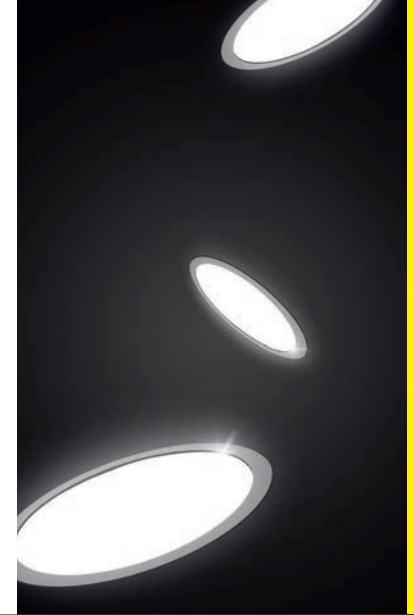

We offer a free next-day delivery service on orders above £250.00 for products which we keep in stock or do not require build up, please enquire when placing your order about the lead time of the product. Orders under £250.00 are subject to a small carriage charge of £15.00. Oversized pallets or orders required urgently may incur additional charges, please enquire. For conversion or refurbishment orders where the luminaires may not be well packaged, we recommend that the luminaires are delivered and collected via your own transport to ensure that the goods remain in good condition.

Our cut-off time for next-day delivery on stock lines is 1PM.

Easily located within the M25 Corridor for all your urgent collection requirements.

M-LINE SUSPENDED & SURFACE SYSTEM

Construction

The suspended and surface system utilises the same profile and is available in standard lengths up to 2824mm with bespoke lengths available to order. Surface mounting is achieved by directly fixing through the rear of the profile. Suspension is made simple using a single-point ceiling bracket with 2m adjustable stainless steel wire system. Uplighting is available on lengths from 584mm upwards.

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Retail Units, Bars, Restaurants, Hotels and Leisure Facilities, and Residential Properties.

- // Aluminium extruded sections in 9 standard lengths
- // Bespoke lengths available in 140mm increments
- // 104 lumens per watt
- // Colour options in 3000K/4000K/5000K
- // Custom shapes available subject to design
- // Incorporates European branded LED drivers
- // Direct/Indirect lighting options available for suspended fittings
- // Utilises latest generation long-life LEDs from leading manufacturers
- // Clip-in gear tray for easy installation
- // Opal polycarbonate diffuser
- // Tuneable white and RGB options available
- // Dimmable and emergency options available
- // Compatible with Casambi wireless control system
- // Dual Switch option available
- // CRI>80, 50,000h life
- // 5-year warranty

M-LINE RECESSED SYSTEM

Construction

The recessed system is available in standard lengths up to 2840mm with bespoke formations and continuous lengths available to order. The standard system is designed for ceiling mounting, however, wall mounting systems can be supplied on request. Installation is simple using the easy-fix bracket system.

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Retail Units, Bars, Restaurants, Hotels and Leisure Facilities, and Residential Properties.

- // Aluminium extruded sections in 9 standard lengths
- // Bespoke lengths available to order in 140mm increments
- // 104 lumens per watt
- // Colour options in 3000K/4000K/5000K
- // Custom-shaped formations subject to design
- // Incorporates European branded LED drivers
- // Utilises latest generation long-life LEDs from leading manufacturers
- // Clip-in gear tray for easy installation
- // Opal polycarbonate diffuser
- // Tuneable white and RGB options available
- // Dimmable and emergency options available
- // Compatible with Casambi wireless control system
- // CRI>80, 50,000h life
- // 5-year warranty

M-LINE XL RECESSED

Construction

The recessed system is available in standard lengths up to 2840mm with bespoke formations and continuous lengths available to order. The standard system is designed for ceiling mounting, however, wall mounting systems can be supplied on request. Installation is simple using the easy-fix bracket system.

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Retail Units, Bars, Restaurants, Hotels and Leisure Facilities, and Residential Properties.

- // Aluminium extruded sections in 9 standard lengths
- // Bespoke lengths available to order in 140mm increments
- // Colour options in 3000K/4000K/5000K
- // Custom-shaped formations subject to design
- // Incorporates European branded LED drivers
- // Utilises latest generation long-life LEDs from leading manufacturers
- // Up to 104 lumens per circuit watt
- // Clip-in gear tray for easy installation
- // Opal polycarbonate diffuser
- // Tuneable white and RGB options available
- // Dimmable and emergency options available
- // Compatible with Casambi wireless control system
- // 5-year warranty

M-LINE 38 SURFACE AND SUSPENDED

Construction

The suspended and surface system utilises the same profile and is available in standard lengths up to 2824mm with bespoke lengths available to order. Surface mounting is achieved by directly fixing through the rear of the profile. Suspension is made simple using a single point ceiling bracket with 2m adjustable stainless steel wire system. Uplighting is available on lengths from 584mm upwards.

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Retail Units, Bars, Restaurants, Hotels and Leisure Facilities and Residential Properties.

- // Aluminium extruded sections in 9 standard lengths
- // Bespoke lengths available in 140mm increments
- // Colour options in 3000K/4000K/5000K
- // Custom shapes available subject to design
- // Incorporates European branded LED drivers
- // Up to 104 lumens per circuit watt
- // Utilises latest generation long-life LEDs from leading manufacturers
- // Clip-in gear tray for easy installation
- // Opal polycarbonate diffuser
- // Tuneable white and RGB options available
- // Dimmable and emergency options available
- // Compatible with Casambi wireless control system
- // Dual Switch option available

M-LINE 48 - UGR19 DIRECT/INDIRECT

- // Aluminium extruded sections in 15 standard lengths
- // Bespoke lengths available in multiple increments of 560mm and 280mm
- // Colour options in 3000K/4000K
- // Incorporates European-branded LED drivers
- // Utilises latest generation long-life LEDs from leading manufacturers
- // Dimmable and emergency options are available
- // Compatible with Casambi wireless switching system
- // Uniform light and controlled beam with specialised diffuser
- // CRI>80
- // 5-year warranty

Construction

Low glare, UGR19 compliant luminaire is supplied as a suspended fitting with direct and indirect light distribution. Suspension is made simple using a single-point ceiling bracket with a 2m adjustable stainless steel wire system. The linear aluminium profile is available in standard lengths up to 4551mm, with bespoke lengths available to order upon request. The low UGR is achieved with a specialised microprismatic diffuser manufactured from extruded PMMA.

Typical Applications

General Office Areas, Conference Rooms, Educational Facilities, Reception Areas, Retail Units, Healthcare Facilities, Hospitality and Leisure Facilities.

- // Dimmable and emergency options are available
- // Compatible with Casambi wireless switching system
- // Uniform light and controlled beam with specialised diffuser
- // CRI>80
- // 5-year warranty

Construction

Low glare, UGR19 compliant luminaire is supplied as a recessed fitting with direct and even light distribution. Recessing the LED linear profile requires an extra 10mm cut out for each standard length. The recessed linear aluminium profile is available in standard lengths up to 4517mm, with bespoke lengths available to order upon request. The low UGR is achieved with a specialised microprismatic diffuser manufactured from extruded PMMA.

Typical Applications

General Office Areas, Conference Rooms, Educational Facilities, Reception Areas, Retail Units, Healthcare Facilities, Hospitality and Leisure Facilities.

M-LINE 54 - LOW GLARE UGR19

Construction

Low glare, UGR19 compliant luminaire is supplied as a suspended fitting as standard, but the profile can be utilised for surface mounting. This is achieved by directly fixing through the rear of the profile. Suspension is made simple using a single-point ceiling bracket with a 2m adjustable stainless steel wire system. The linear aluminium profile is available in standard lengths up to 4523mm with bespoke lengths and shapes available to order upon request. The Low UGR is achieved with a specialised polycarbonate diffuser.

Typical Applications

General Office Areas, Conference Rooms, Educational Facilities, Retail Units, Healthcare Facilities, Hospitality and Leisure Facilities.

- // Aluminium extruded sections in 15 standard lengths
- // Bespoke lengths available in multiple increments of 560mm and 280mm
- // Colour options in 3000K/4000K
- // Custom shapes available subject to design
- // Incorporates European-branded LED drivers
- // Utilises latest generation long-life LEDs from leading manufacturers
- // Dimmable and emergency options are available
- // Compatible with Casambi wireless control system
- // Uniform light and controlled beam with specialised diffuser
- // Low UGR
- // Energy efficient with over 150 lm/W
- // Lifetime >80,000 h L80 B10
- // CRI>80
- // 5-year warranty

M-LINE SLIMLINE HEXAGON

Construction

Our MLE35/HEX slimline hexagon is a contemporary lighting option perfect for modern offices and design-led industrial spaces. Manufactured using 35mm x 35mm aluminium box section, which is powder coated with 3 standard colours or a RAL colour of your choice. The light source is either an 8.8W or 19.2W p/m high-density LED Tape. The LED Driver is mounted remotely, and a single driver can feed several units. The slimline hexagon is great as a single pendant, but when grouped in multiples to create a geometric feature, it is breathtaking.

Typical Applications

General Offices Areas, Reception Areas, Atriums, Retail Units, Bars, Restaurants, Residential Properties, Hotels and Leisure Facilities.

Size Options

*Measurements are displayed in mm

- // 35mm x 35mm aluminium profile
- // Remote LED driver
- // 8.8 W/M or 19.2 W/M high-density LED tape
- // 4000K as standard, 3000K option available
- // IP20
- // Black, white and grey as standard with other RAL colours available upon request.
- // CRI >90
- // 5-year warranty

M-LINE BESPOKE SHAPES & CUSTOM LENGTHS

M-LINE BESPOKE SHAPES & CUSTOM LENGTHS

Construction

M-Line's sleek aluminium profile can be adapted to form many bespoke linear lengths and shaped designs. Corner sections are fully lit to enhance the visual impact that continuous lighting creates. Suspended and wall-mounted systems can be supplied to incorporate direct/indirect lighting options with dual switching available. The system can also be surface mounted or recessed in both ceilings and walls.

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Hotels and Leisure Facilities, Residential Properties, Retail, Bars and Restaurants.

- // Aluminium extruded sections in 9 standard lengths and can be increased by 140mm increments
- // Bespoke shaped formations subject to design
- // Colour options in 3000K/4000K/5000K
- // Incorporates European branded LED drivers
- // Direct/Indirect lighting options available for suspended and wall mounted
- // Utilises latest generation long-life LEDs from leading manufacturers
- // Clip-in gear tray for easy installation
- // Opal polycarbonate diffuser
- // Tuneable white and RGB options available
- // Dimmable and emergency options available
- // Compatible with Casambi wireless control system
- // Dual Switch option available
- // Also available in recessed trimless system
- // CRI>80, 50,000h life
- // 5-year warranty

M-LINE BESPOKE SHAPES & CUSTOM LENGTHS

Possible Concepts/Shape Formations

M-LINE CONTINUOUS SYSTEM

Construction

M-Line's sleek aluminium profile can be adapted to form many bespoke linear lengths. Corner sections are fully lit to enhance the visual impact that continuous lighting creates. Suspended and wall-mounted systems can be supplied to incorporate direct/indirect lighting options with dual switching available.

The system can also be surface mounted or recessed in both ceilings and walls.

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Hotels and Leisure Facilities, Residential Properties, Retail, Bars and Restaurants.

- // Aluminium extruded sections in 9 standard lengths and can be increased by 140mm increments
- // Bespoke-shaped formations subject to design
- // Aluminium blanking plates available
- // Colour options in 3000/4000/5000K
- // Incorporates European branded LED drivers
- // Direct/Indirect lighting options available for suspended and wall mounted
- // Utilises latest generation long-life LEDs from leading manufacturers
- // Clip-in gear tray for easy installation
- // Opal polycarbonate diffuser
- // Tuneable white and RGB options available
- // Dimmable and emergency options available
- // Compatible with Casambi wireless control system
- // Dual switch option available

M-LINE CONTINUOUS SYSTEM

Presence Detector

Presence detectors are typically flush mounted in a 50mm wide aluminium plate.

Light Spill Plate

The innovative light spill plate has been designed to clip in where sections join to hide any unsightly light bleed.

Joining System

Dual joining plates are mounted within the profile, that slide into grooves in either section to ensure a rigid fit.

Suspension Set

Snap-on suspension clip allows easy location at any point along back of luminaire. Alternative lengths available.

Quick Release Clamps

The quick-release clamp provides a tool-free secure installation method.

Clip-in Gear Tray

Gear tray is secured using pre-installed clips, which allows for a tool-free installation.

LENS-LINE LINEAR LED

48

Lens-Line

LENS-LINE LINEAR LED

LENS-LINE

Construction

Low glare, UGR19 compliant LED linear fitting that outperforms its rivals in light distribution and efficiency. Manufactured in-house from a 2-part aluminium extrusion, the profile allows for hidden controls and the option of surface mounting or 2m suspension points positioned anywhere along the length of the luminaire. The Lens-Line is also available in 8 different standard lengths or continuous, uninterrupted lengths by adding increments of 280mm and includes options for 75%/25% direct/indirect light distribution.

The Lens-Line is the most sustainable UGR19 linear lighting option with low carbon footprint and high energy efficiency.

- // Supports UGR19
- // Super efficiency at 195 lumens per watt
- // Available in 8 standard lengths
- // Surface, suspended and suspended direct/indirect mounting options available
- // Continuous lengths available in increments of 280mm
- // Emergency and DALI options available
- // Compatible with Casambi wireless control system
- // White as standard, black and grey options available
- // 3000K option available
- // IP20
- // CRI>80
- // 5-year warranty

Typical Applications

General Office Areas, Task Spaces, Educational Facilities, Medical and Health Facilities, Conference Rooms and Reception Areas.

FLOE-LINE BESPOKE SHAPES AND CUSTOM LENGTHS

FLOE-LINE BESPOKE SHAPES AND CUSTOM LENGTHS

Construction

The Floe-Line sections are designed to let you create endless shapes of continuous light. Available as recessed, surface ceiling mounted or suspended using a single-point ceiling suspension with colour-matched ceiling roses, it creates an aesthetically astonishing lighting solution. The versatility of the aluminium body and LED technology used allows for inclusion of many control options, including dimming, emergency options, wireless switching and scene-setting Casambi technology.

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Shopping Malls, Retail Units, Bars, Restaurants, Hotels and Leisure Facilities, and Residential Properties.

- // Decorative recessed, suspended or surface mounted curved and linear LED luminaire
- // European branded LED drivers
- // Up to 120 lumens per circuit watt
- // Direct or direct/indirect in 90:10 ratio available
- // Extruded aluminium body available in a variety of colours
- // Colour-matched ceiling rose
- // Various radius and linear sized sections to choose from
- // LED 4000K, CRI >80, 50,000h life
- // Opal polycarbonate diffuser as standard, microprism option available
- // Compatible with Casambi wireless control system
- // 5-year warranty

T-LINE MODULAR SYSTEM

Construction

When it comes to staying at the forefront of contemporary interior design, luminaires such as the originative T-Line shine brighter than the rest. Not only is this leading-edge lighting feature manufactured in house from superior lighting technology to ensure strong, consistent illumination but for tailored design features. The T-Line system can be made in multiple lengths and custom shapes by using our fabricated aluminium joining pieces. Cross pieces and corners can be formed to create uniform, bespoke shapes or geometric patterns to expand with your space. To further the outstanding qualities of this luminaire to match the finer details of your interior, there are tuneable white and RGBW options available.

- // Infinite configuration possibilities
- // Choice of RAL colours for joining pieces and end caps
- // Other shapes on request
- // Ceiling roses available in white or black (other RAL on request)
- // Emergency, DALI and Dimmable options
- // Tuneable White and RGBW options available
- // Compatible with Casambi wireless control system
- // CRI>80, 50,000 Hour life
- // IP20
- // 5-year warranty
- // Made in Britain

HLO108/DIR/IND	112W	9096	81	4000K	1950 x 65 x 85mm

Construction

The Halo is designed to be surface mounted or suspended to a single suspension point. Available in 5 different sizes and a wide variety of RAL colours. It is the ideal option when lighting a large open space or simply wanting to create a stunning feature. The versatility of the aluminium body and LED technology used allows for inclusion of many control options, including dimming, emergency options, wireless switching and scene-setting Casambi control technology.

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Retail Units, Bars, Restaurants, Hotels and Leisure Facilities, and Residential Properties.

- // Decorative surface/suspended LED luminaire
- // European branded LED drivers
- // Up to 83 lumens per circuit watt
- // Direct/Indirect option available - 90:10 ratio
- // Extruded aluminium body available in 16 colours
- // Colour-matched ceiling rose
- // 650mm, 950mm, 1250mm, 1550mm and 1950mm diameter body
- // LED 4000K, CRI>80, 50,000h life
- // Opal polycarbonate diffuser
- // Compatible with Casambi wireless control system
- // 5-year warranty

CANTA

Surface/Suspended
Pendant Light

- // Surface/Suspended luminaire
- // High-quality powder-coated aluminium
- // 3000K option
- // Single LED
- // CRI>80, IP20
- // Flex length can be adjusted
- // Compatible with Casambi wireless control system
- // 5-year warranty

Construction

Our Canta luminaire has been designed as a stylish option for surface or suspended applications and is ideal where appearance is important. The body is powder-coated aluminium and gives good heat dissipation. The faceted reflector has a good reflective rate.

Typical Applications

Hospitality, Tea Points, Seating, Reception and Leisure Areas.

LUMALED

High-Power Slimline LED Downlight

- // Ideal replacement for 210mm PL downlights
- // Slimline design only 45mm
- // High-performance aluminium heat sink
- // 90° wide beam angle
- // Switchable 3 x CCT 3000K, 4000K, 5700K
- // Surface/suspension case option available in black and white
- // DALI and emergency options available
- // Dimming available when using Triac dimmer
- // IP54
- // CRI>80, 50,000 hours life
- // 5-year warranty

Construction

Our LumaLED luminaire has been designed as a direct replacement for 210mm PL downlights. The panel surround is manufactured using white powder coated aluminium material. The high-performance heat sink is manufactured using die-cast aluminium, connection from the luminaire to the driver is a simple process utilising simple plug and play connectors. The 3 x CCT colour changeable switch makes for easy use to create the correct temperature light for the right setting.

Typical Applications

Toilets, Corridors, Stairways, General Office Areas, Reception Areas, Conference Rooms, Retail Units, Schools, Hotels and Leisure Facilities.

ENFORCE

Low UGR Surface/Suspended LED Downlight

- // Incorporates Tridonic LED and driver system
- // Multi-faceted 60° reflector as standard
- // Finished in RAL 9016 brilliant white as standard
- // Black and grey options available
- // 3000K and 4000K options
- // Integral emergency option
- // Dimming options available
- // Surface as standard (suspension mounting available)
- // IP20
- // CRI>80
- // 5-year warranty
- // Manufactured in UK

Construction

Our low glare, UGR19 compliant Enforce downlight has been selected for use in surface or suspended mounted applications and can be mounted directly onto a ceiling or BESA box. The powder-coated aluminium body provides corrosion resistance and excellent heat dissipation. The high-quality reflector is sealed by a clear diffuser. The size of the fitting allows for integral emergency controls.

Typical Applications

Amenity Areas, Toilets, Tea-Points, Canteens, Receptions and General Office and Breakout Areas.

VENTOR

Large Surface/Suspended LED Downlight

- // Spun aluminium downlight with a wide range of options
- // Philips LED and driver combination
- // 60° Satin etch reflector as standard
- // Alternative reflector and diffuser options
- // Colour combination options
- // Dimmable and emergency options available
- // Life >60,000 hours (L70/B10)
- // IP20
- // 5-year warranty
- // Manufactured in UK

Construction

The VENTOR is our largest cylindrical downlight and can be suspended or surface mounted or applied directly onto a ceiling or BESA box.

The powder coated aluminium body provides corrosion resistance and excellent heat dissipation. The size of the body allows for the integral emergency controls. The high quality satin etch reflector gives an even distribution of illumination.

Typical Applications

Amenity, Toilets, Tea-Points, Canteens, Reception Areas, General Office Areas and Breakout Areas.

BLADE

Construction

The Blade suspended panel has been specifically designed as an attractive option for exposed ceilings. The seamless frame is manufactured from aluminium, and the microprism internal diffuser can achieve better than UGR19 glare rating. The Y point 1.5m suspension kit fits easily to the fixing-free ceiling rose while the control gear is set inside a durable housing. As standard, the luminaire utilises a branded electronic control gear.

Typical Applications

Exposed Ceilings, Office Areas, Meeting Rooms, Reception Areas, Waiting Rooms, Schools, Hospitals, Production Facilities.

Size Options

- // Supports UGR19 compliance
- // CRI80
- // 70/30 direct & indirect light distribution
- // Ceiling rose to house control gear
- // 4000K as standard
- // Black trim available (other colours by request)
- // 5-year warranty
- // Longer length suspension kits are available

HALO

HALO

Construction

The Halo is designed to be surface mounted or suspended to a single suspension point. Available in 5 different sizes and a wide variety of RAL colours. It is the ideal option when lighting a large open space or simply wanting to create a stunning feature. The versatility of the aluminium body and LED technology used allows for inclusion of many control options, including dimming, emergency options, wireless switching and scene-setting Casambi control technology.

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Retail Units, Bars, Restaurants, Hotels and Leisure Facilities, and Residential Properties.

- // Decorative surface/suspended LED luminaire
- // European branded LED drivers
- // Up to 83 lumens per circuit watt
- // Direct/Indirect option available - 90:10 ratio
- // Extruded aluminium body available in 16 colours
- // Colour-matched ceiling rose
- // 650mm, 950mm, 1250mm, 1550mm and 1950mm diameter body
- // LED 4000K, CRI>80, 50,000h life
- // Opal polycarbonate diffuser
- // Compatible with Casambi wireless control system
- // 5-year warranty

CANTA

Surface/Suspended
Pendant Light

- // Surface/Suspended luminaire
- // High-quality powder-coated aluminium
- // 3000K option
- // Single LED
- // CRI>80, IP20
- // Flex length can be adjusted
- // Compatible with Casambi wireless control system
- // 5-year warranty

Low UGR Surface/Suspended
LED Downlight

- // Incorporates Tridonic LED and driver system
- // Multi-faceted 60° reflector as standard
- // Finished in RAL 9016 brilliant white as standard
- // Black and grey options available
- // 3000K and 4000K options
- // Integral emergency option
- // Dimming options available
- // Surface as standard (suspension mounting available)
- // IP20
- // CRI>80
- // 5-year warranty
- // Manufactured in UK

Construction

Our Canta luminaire has been designed as a stylish option for surface or suspended applications and is ideal where appearance is important. The body is powder-coated aluminium and gives good heat dissipation. The faceted reflector has a good reflective rate.

Typical Applications

Hospitality, Tea Points, Seating, Reception and Leisure Areas.

Construction

Our low glare, UGR19 compliant Enforce downlight has been selected for use in surface or suspended mounted applications and can be mounted directly onto a ceiling or BESA box. The powder-coated aluminium body provides corrosion resistance and excellent heat dissipation. The high-quality reflector is sealed by a clear diffuser. The size of the fitting allows for integral emergency controls.

Typical Applications

Amenity Areas, Toilets, Tea-Points, Canteens, Receptions and General Office and Breakout Areas.

VENTOR

Large Surface/Suspended LED Downlight

- // Spun aluminium downlight with a wide range of options
- // Philips LED and driver combination
- // 60° Satin etch reflector as standard
- // Alternative reflector and diffuser options
- // Colour combination options
- // Dimmable and emergency options available
- // Life >60,000 hours (L70/B10)
- // IP20
- // 5-year warranty
- // Manufactured in UK

Construction

The Ventr is our largest cylindrical downlight and can be suspended or surface mounted or applied directly onto a ceiling or BESA box.

The powder coated aluminium body provides corrosion resistance and excellent heat dissipation. The size of the body allows for the integral emergency controls. The high quality satin etch reflector gives an even distribution of illumination.

Typical Applications

Amenity, Toilets, Tea-Points, Canteens, Reception Areas, General Office Areas and Breakout Areas.

LUMALED

High-Power Slimline LED Downlight

- // Ideal replacement for 210mm PL downlights
- // Slimline design only 45mm
- // High-performance aluminium heat sink
- // 90° wide beam angle
- // Switchable 3 x CCT 3000K, 4000K, 5700K
- // Surface/suspension case option available in black and white
- // DALI and emergency options available
- // Dimming available when using Triac dimmer
- // IP54
- // CRI>80, 50,000 hours life
- // 5-year warranty

Construction

Our LumaLED luminaire has been designed as a direct replacement for 210mm PL downlights. The panel surround is manufactured using white powder coated aluminium material. The high-performance heat sink is manufactured using die-cast aluminium, connection from the luminaire to the driver is a simple process utilising simple plug and play connectors. The 3 x CCT colour changeable switch makes for easy use to create the correct temperature light for the right setting.

Typical Applications

Toilets, Corridors, Stairways, General Office Areas, Reception Areas, Conference Rooms, Retail Units, Schools, Hotels and Leisure Facilities.

CASCADE

Contemporary Wall Lighting Solution

- // Wall mounted up & down light
- // Robust aluminium construction
- // IP20
- // DALI option available
- // Integral emergency solution available
- // Available in 3000K
- // White as standard, black option available
- // Other RAL colours upon request
- // 5-year warranty

Construction

The Cascade wall light has been designed to provide equal up and downlight distribution, whilst cleverly concealing the LED board and emergency control gear. The robust aluminium housing is white as standard with black and other RAL colours available to sit in seamlessly with your interior designs. This aesthetically pleasing wall light is the perfect solution for any commercial applications, especially CAT A & B fit outs where a cascade of light is required in low light stairwells and corridors.

Typical Applications

Stairwells, Corridors, Lobbies and Reception Areas.

MEA

High-Performance Surface Luminaire Ideal for Schools

- // Secure 4 point fixing system
- // Can be wall or ceiling mounted
- // Presence detection options
- // Anti-tamper end cap fixings
- // 3000K available
- // Opal diffuser as standard
- // CRI>80
- // 5-year warranty

Construction

Our MEA luminaire has been designed as an ideal replacement solution where there is a requirement to upgrade less energy efficient T8/T5 fluorescent luminaires to a more modern energy efficient and aesthetically pleasing unit. The luminaire is constructed using 0.5mm sheet steel white powder-coated sheet steel. The diffuser section is manufactured as a single extruded acrylic curve, which spreads the light onto the ceiling whilst providing a high level of downward light. The fitting is constructed using quality European branded LED boards and drivers.

Typical Applications

Classrooms, Corridors, Toilets, Stores Areas and Warehouses.

ECO-LINE

LED Batten

- // Opal polycarbonate diffuser
- // IP20 for indoor use only
- // LED CRI>80, 40,000h life
- // Removable gear tray for easy installation
- // BESA box entry points
- // 20mm conduit entry in end caps
- // Presence detection options
- // 4000K as standard
- // 5-year warranty

Construction

The Eco-Line is designed to be surface mounted and, with its simple design and construction, gives superior capability. This highly efficient luminaire is not only energy saving, it is easy to fit by simply unclipping the diffuser and gear tray. The main channel of batten allows easy cable entry via the BESA entries. The polycarbonate diffuser achieves anti-glare but high light transmittance. As standard, the luminaire utilises recognised branded LED boards and drivers.

Typical Applications

Hospitals, Warehouses, Factories, Retail and Supermarkets etc.

ENDURA

LED Corrosion-Resistant Luminaire

- // High-output opal polycarbonate diffuser
- // High efficiency LED driver and strip
- // European branded components
- // Maintenance free, no need to relamp
- // Presence detection options
- // Supplied with easy fix system for surface or suspended installation
- // Emergency and dimmable versions available
- // IP65
- // 3000K available
- // CRI>80
- // 5-year warranty

Construction

Our Endura IP65 LED corrosion resistant luminaire has been designed as an all-round weatherproof luminaire ideally suited to industrial applications. The luminaire base and opal diffuser are manufactured using high-grade impact resistant polycarbonate material. We have designed our luminaire with an easy fix system which enables the luminaire to be either directly surface mounted using the stainless steel brackets or suspended using the hook set provided, this system ensures the IP65 rating of the luminaire is maintained at all times. Stainless steel clips are supplied as standard.

As standard, the luminaire utilises branded electronic control gear mounted on white powder-coated metal gear tray.

Typical Applications

Carparks, Warehouses, Cold Stores, Food Processing Plants, Jet Wash Zones, Laboratories, Plant Rooms, External Canopies and Animal Housing Areas.

FLOWLED I

VOLT

High-Output High-Performance
LED Low-Bay Luminaire

- // Highly effective sealed LED solution
- // Presence detection options available
- // Up to 125 lumens per circuit watt
- // European branded LED driver
- // Emergency options available
- // 5-12m mounting height
- // IP20 as standard, IP54 and IP65 options available
- // Available in 3000K and 5000K options
- // Universal mounting bracket for surface and conduit mounting available
- // CRI>80
- // 5-year warranty

Construction

The FlowLED low-bay luminaire is designed to be very effective and energy efficient. The luminaire body is laser profiled steel and white powder-coated finish. The diffuser is a light opal satin acrylic. The luminaire is supplied with a universal mounting bracket suitable for surface mounting or by chain suspension, mounting on lighting trunking and directly onto conduit BESA boxes. As standard, the luminaire utilises branded electronic control gear from major manufacturers.

Trunking Bracket

Typical Applications

Warehouses, Production Facilities and Sports Halls.

HALO RECESSED

Construction

The Halo Recessed is designed for recessing into ceilings. Available in 3 different sizes and a wide variety of RAL colours. It is the ideal option when lighting a large open space or simply wanting to create a stunning feature. The versatility of the aluminium body and LED technology used allows for inclusion of many control options, including dimming, emergency options, wireless switching and scene-setting Casambi technology.

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Retail Units, Bars, Restaurants, Hotels and Leisure Facilities, and Residential Properties.

- // Decorative recessed LED luminaire
- // European branded LED drivers
- // Up to 80 lumens per circuit watt
- // Extruded aluminium body available in 16 colours
- // 676mm, 976mm, 1276mm diameter body
- // LED 4000K, CRI > 80, 50,000h life
- // Opal polycarbonate diffuser
- // Compatible with Casambi wireless control system
- // 5-year warranty

EPIC

IP65 Sealed LED Downlight

- // 60° beam angle
- // Available in 5W, 10W or 13W
- // Mains dimmable as standard
- // CRI>80
- // Tiltable version available in 13W
- // 3000K option available
- // PF 0.9
- // 40,000 hours rated life
- // Complete with driver
- // 5-year warranty

Construction

Our Epic range of LED downlights has been designed as an IP65 LED downlight suitable for multiple applications where a high-output, recessed downlighter is required. It is suitable for installation directly into either suspended or plasterboard ceilings.

The luminaire housing is manufactured using die-cast aluminium and finished with a white powder-coated bezel. The faceted reflector is manufactured using highly polished aluminium material, and the sealed diffuser is manufactured using PMMA material.

Typical Applications

Toilets, Shower Rooms, Corridors, General Office Areas, Conference Rooms, Reception Areas, Retail and Leisure Facilities.

LUMALED

High-Power Slimline LED Downlight

- // Ideal replacement for 210mm PL downlights
- // Slimline design only 45mm
- // High-performance aluminium heat sink
- // 90° wide beam angle
- // Switchable 3 x CCT 3000K, 4000K, 5700K
- // Surface/suspension case option available in black and white
- // DALI and emergency options available
- // Dimming available when using Triac dimmer
- // IP54
- // CRI>80, 50,000 hours life
- // 5-year warranty

Construction

Our LumaLED luminaire has been designed as a direct replacement for 210mm PL downlights. The panel surround is manufactured using white powder coated aluminium material. The high-performance heat sink is manufactured using die-cast aluminium, connection from the luminaire to the driver is a simple process utilising simple plug and play connectors. The 3 x CCT colour changeable switch makes for easy use to create the correct temperature light for the right setting.

Typical Applications

Toilets, Corridors, Stairways, General Office Areas, Reception Areas, Conference Rooms, Retail Units, Schools, Hotels and Leisure Facilities.

LEP32LG600

Low Glare Backlit LED Panel

- // Supports UGR19 compliance
- // Tridonic control gear
- // 108 lumens per circuit watt
- // 3350 lumen output
- // LED 4000K, CRI>80, 50,000 hours life
- // Low maintenance (No user-serviceable parts)
- // Available in 3000K
- // Low energy consumption
- // SMD 2835 Chipset
- // Alternative wattages available
- // 5-year warranty

Construction

Our LEP32LG LED panel has been designed as a direct replacement for a 600 x 600 recessed modular luminaire and will fit within any standard suspended ceiling grid which has an aperture of 595mm x 595mm. The frame of the luminaire is manufactured using an aluminium profile which is finished using white powder coating designed to blend well with the ceiling grid.

The LED light source is powered by SMD2835 LED chips. The panel diffuser is manufactured using PS material which is a hard highly transparent material which is UV stable, offers good chemical resistance, is simple to clean and scratchproof.

Typical Applications

Office Areas, Schools, Laboratories, Clean Rooms and Production Facilities.

Size Options

LEP32LG1200

Low Glare Backlit LED Panel

- // Supports UGR19 compliance
- // Alternative size mounting frames available
- // Tridonic control gear
- // 109 lumens per circuit watt
- // LED 4000K, CRI>80, 50,000 hours life
- // Low maintenance (No user-serviceable parts)
- // Available in 3000K
- // Low energy consumption
- // SMD 2835 Chipset
- // Alternative wattages available
- // 5-year warranty

Construction

Our LEP32LG 1200 x 300 has been designed to fit within SAS330 1200mm x 300mm Plank ceiling applications. We have created a bespoke aluminium frame that can be used when installing or upgrading lighting within metal pan ceilings. The frame is manufactured in RAL9010 as standard but can be powder coated to a RAL of your choice.

The LED light source is powered by SMD2835 LED chips, has low energy consumption with superb lumen output and is UGR19 applicable. The panel diffuser is manufactured using PS material that is a hard, highly transparent material, which is UV stable, offers good chemical resistance, is simple to clean and scratchproof.

Typical Applications

Office Areas, Schools, Laboratories and Production Facilities.

VELO

Low Glare LED Downlight

- // Supports UGR19 compliance
- // Aluminium body
- // 60 degree beam angle
- // 3000K option
- // Available in 18w, 25w or 35w
- // High light output - up to 3600 lumens
- // Interior use
- // CRI>80
- // IP54
- // Complete with driver
- // 5-year warranty

Construction

Our Velo range of LED downlights has been selected for use in recessed applications and can be mounted into suspended or plasterboard ceilings. The powder-coated aluminium body provides corrosion resistance and excellent heat dissipation. The high-quality deep reflector has a good reflective rate and is suitable for UGR19 applications.

Typical Applications

Amenity, Tea-Points, Canteens, Receptions, Corridors and General Office Areas.

Commercial LED Downlight

- // Recessed opal PC diffuser
- // SMD LED powered by Tridonic
- // Bezel finished in RAL9016 white
- // Switchable 3 x CCT 830, 840, 855
- // Emergency and dimming options available
- // IP54
- // Life up to >50,000 hours L70
- // 3-year warranty
- // Manufactured in UK

Construction

The Laguna IP54 commercial downlight is the perfect slimline high-output LED downlight. The steel bezel is finished in an attractive RAL9016 white. The LED light source is powered by SMD LED chips. Diffuser material is opal polycarbonate.

Typical Applications

Corridors, Toilets, General Function Areas, Meeting Rooms, Retail and Leisure Facilities.

Construction

Our Multi-Track system is a three-circuit product with DALI options for mounting LED luminaires. With a large range of accessories, this is the ideal solution for accent and task lighting. The system is EN 60570 certified and can be installed directly onto ceilings and walls or suspended using the correct fixing method.

There is a wide range of spotlights to supplement the track system to offer versatile lighting solutions.

Typical Applications

Commercial Offices, Galleries, Libraries, Museums, Display Areas and Retail Units.

EMERGENCY TRACK LIGHTING ADAPTER

Emergency LED Track Lighting Solution

- // Suitable for mounting to our Multi-Track Lighting System
- // Convenient switch to control maintained or non-maintained
- // Intelligent IC control appliance
- // Available in black or white
- // Push to 'test' switch
- // Battery on/off switch easily connects the battery, with no need to remove the frame
- // Long-life lithium battery

Construction

Our Emergency LED Track adaptor is the ideal solution for use with our Multi-Track Lighting System. The adaptor provides discreet emergency lighting in areas that require a self-contained function powered by the track system. With the convenient switch for maintained and non-maintained and push to test switch the emergency adaptor also provides high quality, long-life lithium battery with an on/off switch.

Typical Applications

Offices, Galleries, Theatres, Conference Rooms, Libraries, Hospitality, Task and Accent Lighting.

Size Options

*Measurements are displayed in mm

Product Code	Description
30001/PL-EM/BLACK	3 Circuit Track Emergency Module Universal - Black
30001/PL-EM/BLACK/ST	3 Circuit Track Emergency Module Universal - Black Self Test

DALI EMERGENCY TRACK LIGHTING ADAPTER

DALI Emergency LED Track Lighting Solution

- // Suitable for mounting to our Multi-Track Lighting System
- // Available in standard and DALI options
- // Available in black or white
- // Tamper proof polycarbonate enclosure
- // Includes high powered LED with integral LED indicator
- // Long-life NIMH battery

Construction

Our DALI Emergency LED Track adaptor is the ideal solution for use with our Multi-Track Lighting System. The adaptor provides discreet emergency lighting in areas that require a self-contained function powered by the track system. With the convenient switch for maintained and non-maintained and push to test switch, the emergency adaptor also provides high quality, long-life lithium battery with an on/off switch.

Typical Applications

Offices, Receptions, Galleries, Theatres, Libraries, Hospitality, Educational Facilities, Task and Accent Lighting.

TRS12 TRACK SPOT

LED Track Spotlight

- // Built-in electronic driver
- // Clear safety glass diffuser
- // Extruded aluminium housing
- // Rotation: vertical 90°/horizontal 360°
- // 4000K as standard (3000K available)
- // Circular diamond aluminium reflectors in various degrees
- // Reflector replacement with tools
- // LED replacement with tools
- // Black colour as standard (white available)
- // CRI>80 as standard (CRI>90 available)

Construction

The TRS12 LED track spot is the smallest of the range and has been specially designed to discretely conceal the control gear for use with our Stucchi multi-track system. The extruded aluminium housing is available in black or white. With two colour temperatures and two CRI options to choose from, you can guarantee the perfect light for the right scene.

Typical Applications

Display Areas, Galleries, Libraries, Hospitality, Task and Accent Lighting.

Lamps for Pendants

CARINA

Decorative Glass Pendant

The 240V Carina ceiling pendant is made from chrome glass with a diamond textured shade. The pendant's overall diameter is 230mm.

- // Chrome glass with diamond textured finish
- // For use with E27 lamps
- // Compatible with dimmable lamps
- // IP20
- // 1500mm drop suspension

Construction

The Carina pendant is designed with charm and flare in every layer, including the eye-catching geometric textured glass shade. The bold and clean finish of the Carina luminaire is perfectly designed to complement interiors where design is at the forefront. The fitting is suited to the use of E27 LED lamps (including dimmable).

To further enhance this pendant, it comes with a 1500mm suspension drop that can be minimised by a qualified electrician during installation.

Specifications	
Voltage	240V
Size	Overall Ø260mm
Drop	1500mm

Product Code	Voltage	Lamp
CAR/ES	240V	E27 Standard and Dimmable

Typical Applications

Commercial Office Interiors, Reception Areas, Tea Points, Bars, Restaurants, Hotels, Residential Properties, Bedrooms, and Kitchens.

For optional features, please include the option code suffix with the product code when ordering.

DELPHI

Decorative Pendant

The Delphi ceiling pendant has industrial style and a copper interior finish. The ceiling light has a width of 470mm.

- // Industrial style
- // For use with E27 lamps
- // Compatible with dimmable lamps
- // IP20
- // 1500mm drop suspension

Construction

The Delphi luminaire doesn't need to predict the impact it'll have on the future of your interiors because it's already clear in the sleek and impactful design. With a matt black metal shade and contrasting copper inner, this luminaire will complement any interior. The fitting is suited to the use of E27 LED lamps (including dimmable).

To further enhance this pendant, it comes with a 1500mm suspension drop that can be minimised by a qualified electrician during installation.

Specifications	
Voltage	240V
Size	H 480mm x W 470mm
Drop	1500mm

Product Code	Voltage	Lamp
DPH/ES	240V	E27 Standard and Dimmable

Typical Applications

Commercial Office Interiors, Reception Areas, Tea Points, Bars, Restaurants, Hotels, Residential Properties, Bedrooms, and Kitchens.

For optional features, please include the option code suffix with the product code when ordering.

DORADO

Decorative Pendant

The Dorado features as a single fixture with ceiling rose or a triple decorative pendant. The satin nickel metalwork shade is available as either black or silver with a gold inner finish.

- // Stylish metal shade with black or silver finish and gold inner
- // For use with E27 lamps
- // Compatible with dimmable lamps
- // IP20
- // Overall diameter of 180mm
- // Drop suspension of 1500mm
- // Black single insulated cord

Construction

The Dorado pendant embodies style and impact and ensures that it stays true to its name with a beautiful golden inner finish. This luminaire is the perfect addition to any interior and will bring anything from offices to residential properties to the next level of design. The fitting is suited to the use of E27 LED lamps (including dimmable). To further enhance this pendant, it comes with a black braided single insulated cord that can be minimised by a qualified electrician during installation.

Typical Applications

Commercial Office Interiors, Reception Areas, Tea Points, Bars, Restaurants, Hotels, Residential Properties and Kitchens.

GLOBE

Suspended LED Pendant

The Globe is a stylish suspended pendant that can be mounted on a track, colour-matched ceiling rose or directly to the ceiling. Available in 2 sizes and colours, it is perfect for creating a soft feature with maximum impact.

- // 400mm or 450mm Globes available
- // Integral control gear
- // 3K & 5K options available
- // Track version available
- // Dimming and emergency options
- // CRI>80
- // IP20
- // 5-year warranty

Construction

The opal diffuser gives a warm and bright glow (3000K and 5000K options available to suit various lux levels). The versatility of this pendant and the utilised LED technology provides many control options, including dimming and emergency.

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Retail Units, Bars, Restaurants, Hotels and Leisure Facilities.

HUSH

Construction

Our Hush acoustic light shade has been designed to absorb noise in even the smallest of places and is suitable for multiple applications within the office. It can be installed directly into plasterboard or suspended ceilings. The acoustic shade is made from 50% recycled PET felt and is available in a choice of three tones of grey. The popper fasteners contain 0% formaldehyde and are available in four colour options.

Typical Applications

Open Plan Office Areas, Breakout Spaces, Conference Rooms, Reception Areas, Retail and Hospitality.

Size Options

HYDRA

Decorative 4 Lamp Pendant

The Hydra ceiling pendant is a bright industrial pendant with 4 lamp holders. The pendant is ideal for bright task light in the kitchen or bedroom.

- // Bright industrial pendant
- // 4 lamp fixtures. Requires 4 x LED lamps
- // For use with E27 lamps
- // Compatible with dimmable lamps
- // IP20
- // 1500mm drop suspension

Construction

If there's one way to immortalise design, it's with the Hydra pendant. With 4 lamps instead of the 9 heads of its mythological namesake, this industrial style luminaire is designed to make an impact and complement interiors across a wide range of applications. The fitting is suited to the use of E27 LED lamps (including dimmable).

To further enhance this pendant, it comes with a 1500mm suspension drop that can be minimised by a qualified electrician during installation.

Typical Applications

Commercial Office Interiors, Reception Areas, Tea Points, Bars, Restaurants, Hotels, Residential Properties, Bedrooms, and Kitchens.

Specifications	
Voltage	240 V
Size (Hx W x L)	250 x 300 x 790mm
Drop	1500mm

Product Code	Voltage	Lamp
HYR/ES	240V	E27 Standard and Dimmable

For optional features, please include the option code suffix with the product code when ordering.

LYRA

Copper Mesh Pendant

The Lyra ceiling pendant is a copper metal mesh finish. The 240V contemporary pendant has a diameter of 370mm and drops 1500mm.

- // Contemporary copper metal mesh finish
- // For use with E27 lamps
- // Compatible with dimmable lamps
- // IP20
- // 1500mm drop suspension

Construction

The Lyra pendant combines strong design with beautiful construction. The rich tones of the mesh shade can invigorate any interior and work across a wide range of applications for a pleasing design. The fitting is suited to the use of E27 LED lamps (including dimmable).

To further enhance this pendant, it comes with a 1500mm suspension drop that can be minimised by a qualified electrician during installation.

Specifications	
Voltage	240 V
Size (Hx W x L)	Overall Ø370mm
Drop	1500mm

Product Code	Voltage	Lamp
LYR/ES	240V	E27 Standard and Dimmable

Typical Applications

Commercial Office Interiors, Reception Areas, Tea Points, Bars, Restaurants, Hotels, Residential Properties, Bedrooms, and Kitchens.

For optional features, please include the option code suffix with the product code when ordering.

RIGEL

Decorative Triple Pendant

This chic, bold and bright ceiling pendant uses 3 LED lamps and features hammered metallic shades.

- // Hammered metallic shades
- // For use with E27 lamps
- // Compatible with dimmable lamps
- // IP20
- // 1500mm drop suspension

Construction

Prominent and definitive, the Rigel can light up any interior and is the perfect lighting addition for a wide range of applications. With a decorative and stylish collective of lamps made from hammered metal, this luminaire is designed to put interiors at the forefront. The fitting is suited to the use of E27 LED lamps (including dimmable).

To further enhance this pendant, it comes with a 1500mm suspension drop that can be minimised by a qualified electrician during installation.

Specifications

Commercial Office Interiors, Reception Areas, Tea Points, Bars, Restaurants, Hotels, Residential Properties, Bedrooms, and Kitchens.

For optional features, please include the option code suffix with the product code when ordering.

ROSETTE

5 Arm Industrial Chandelier

This bright industrial ceiling light can fit five lamps, making it ideal for areas that need bright task lighting. The Rosette ceiling pendant has a width of 530mm and a height of 230mm.

- // Bright industrial pendant
- // 5 lamp fixtures. Requires 5 x LED lamps
- // For use with E27 lamps
- // Compatible with dimmable lamps
- // IP20
- // 1500mm drop suspension

Construction

Our Rosette pendant is an industrial and stylish five-lamp chandelier made from metal mesh shade. Orion has been specifically produced to complement interiors where design is at the forefront. The fitting is suited to the use of E27 LED lamps (including dimmable).

To further enhance this pendant, it comes with a 1500mm suspension drop that can be minimised by a qualified electrician during installation.

Typical Applications

Commercial Office Interiors, Reception Areas, Tea Points, Bars, Restaurants, Hotels, Residential Properties, Bedrooms, and Kitchens.

For optional features, please include the option code suffix with the product code when ordering.

ARA

Decorative Polished Pendant

The Ara ceiling pendant features a shiny copper metal shade with a built-in LED panel covered with an opalized shade that softens and diffuses the light. The copper metal shade pendant has a drop up to 3000mm with two shades available in alternative colours.

- // Shiny copper metal shade with opal diffuser
- // For use with E27 lamps
- // Compatible with dimmable lamps
- // IP20
- // Drop suspension of 3000mm
- // Available in Black, Beige, and Grey

Construction

The impact of the Ara pendant luminaire is major, and the industrial and stylish metal shade (available in chrome or copper finish) helps tie together beautiful interiors effortlessly. The fitting is suited to the use of E27 LED lamps (including dimmable) and has the option for DALI functionality. To further enhance this pendant, it is available in two sizes and comes with a 1500mm suspension drop that can be minimised by a qualified electrician during installation.

Typical Applications

Commercial Office Interiors, Reception Areas, Tea Points, Bars, Restaurants, Hotels, Residential Properties, Bedrooms, and Kitchens.

VELA

Mesh Cube Pendant

The Vela ceiling pendant is a stylish industrial mesh shade. With a bold and contemporary shape, the ceiling light is the perfect task light for kitchens and bedrooms.

- // Stylish industrial mesh shade
- // For use with E27 lamps
- // Compatible with dimmable lamps
- // IP20
- // 1500mm drop suspension

Construction

The Vela pendant is an industrial and stylish luminaire that features a hexagonal-patterned metal mesh shade. Vela puts design at the forefront of any interior, with features carefully curated to complement existing design. The fitting is suited to the use of E27 LED lamps (including dimmable).

To further enhance this pendant, it comes with a 1500mm suspension drop that can be minimised by a qualified electrician during installation.

Typical Applications

Commercial Office Interiors, Reception Areas, Tea Points, Bars, Restaurants, Hotels, Residential Properties, Bedrooms, and Kitchens.

COHORT

Circular Surface Bulkhead Luminaire

- // High-performance polycarbonate diffuser and base
- // BESA box and conduit entries
- // Presence detection options
- // IP65
- // Hinged gear tray
- // 3000K available
- // CRI>80
- // 5-years warranty

Construction

Our Cohort circular bulkhead has been specifically designed as an amenity bulkhead for interior or exterior use. The fitting base and diffuser are manufactured using high-grade polycarbonate material, which has been designed to maximise the LOR, ideally suited to the use of LED lamps. To further enhance the protection this luminaire already offers, tamper-proof stainless steel screws are supplied to secure the diffuser.

As standard, the luminaire utilises branded electronic control gear which is mounted on a hinged metal gear tray to enable easy installation.

Typical Applications

External Lighting, Toilets, Store Rooms, Corridors and Warehouse Areas.

COMPASS

Anti-Ligature LED Bulkhead

- // Anti ligature
- // High-performance impact modified polycarbonate diffuser
- // 1.2mm Steel Body
- // Presence detection options
- // Security screws supplied as standard
- // Face entry
- // IP44
- // 3000K available
- // CRI>80
- // 5-year warranty

Construction

Our Compass luminaire has been specifically designed for use in vulnerable areas where safety and anti-ligature lighting is required. The luminaire body is manufactured using 1.2mm steel. The diffuser is manufactured using impact-resistant polycarbonate.

For installation and maintenance, there is a face entry access to ensure paint/anti-pick mastic is not disturbed after installation.

As standard, the luminaire utilises branded electronic control gear which is mounted on a white powder-coated metal gear tray.

Typical Applications

Hospitals, Prisons, Nurseries, Care Homes, Stairwells, Toilets and Corridors.

Size Options

Size
Ø 545mm H 110mm

Halo Effect Surface Luminaire with Versatile Trim Options

- // Polycarbonate base
- // Conduit entry points in base
- // Chrome and brass options
- // Choice of trims
- // Presence detection options
- // IP20
- // Suspension kit available
- // 3000K available
- // CRI>80
- // 5-year warranty

Construction

Our Horizon luminaire has been designed for applications where a halo effect is required or surface wiring will be utilised. The luminaire body is injection moulded using high-impact resistant polycarbonate material to produce a single universal base. Surface cabling to the luminaire is easily achieved by making use of the 20mm side cable entries in the base or via the rear BESA box cable entry point.

The diffuser is vacuum-formed using polycarbonate material and is supplied as standard in Opal microprismatic. The base is supplied as standard in White and can be supplied in Blue, Green or Red to create a coloured halo effect. As standard, the luminaire utilises branded electronic control gear from major manufacturers.

Typical Applications

Stairwells, Corridors, Toilets, Store Rooms, Reception Areas, Hotels and Leisure Facilities.

OPALITE

A Decorative Compact Surface Luminaire

- // Steel base
- // Available in 3 diameters
- // White, black, brass and chrome trim options
- // Recessing bracket available
- // Presence detection options
- // IP20
- // 3000K available
- // CRI>80
- // 5-year warranty

Construction

Our Opalite luminaire has been designed as a universal option and is ideally suited to projects involving Stairwell Refurbishments, Care Homes, Social Housing and Corridor applications, in fact, anywhere a decorative internal bulkhead is required. The base is constructed using mild steel and is supplied in either a powder-coated white or black finish or in a plated finish for the brass and chrome options.

The diffuser is vacuum-formed using polycarbonate material and is supplied in Opal. As standard, the luminaire utilises branded electronic control gear from major manufacturers.

Typical Applications

Stairwells, Corridors, Store Rooms and Bedrooms.

ORION

IP65 Rated Surface Bulkhead with Twist Off Diffuser

- // Available with high-performance opal diffuser as standard
- // Three secure fixing points screw the diffuser to the base
- // Ability to use anti-tamper screws
- // Hinged gear tray for easy maintenance
- // Base available with or without halo effect
- // Available in white, chrome, brass or satin silver trim options
- // IK10 rated
- // CRI>80
- // 5-year warranty

Construction

Our Orion bulkhead has been designed with one fits all in mind. Its appearance fits with any interior application with the variety of trims, yet it can be used externally, too, due to being IP65 and also IK10. The housing is made from polycarbonate and uses a high-transmission diffuser whilst hiding any LED spotting. The base provides the installer with two 20mm cable entry points and a rear BESA mounting point.

As standard, the luminaire utilises control gear from major manufacturers.

Typical Applications

Stairwells, Corridors, Toilets and General Amenity Areas.

STALWART

High-Quality Decorative Die-Cast
External Drum Luminaire

- // Die-cast aluminium housing
- // Highgrade polycarbonate diffuser
- // White as standard, black and silver options available
- // Eyelid cover option
- // IP65
- // 3000K option available
- // CRI>80
- // 5-year warranty

Construction

Our Stalwart luminaire has been designed to be a robust, aesthetically pleasing external bulkhead luminaire. The luminaire base is manufactured using high-grade die-cast aluminium with two 20mm pre-glanded cable entries ensuring installation is a simple task. The diffuser is manufactured using high-grade polycarbonate material. The unit is supplied as standard with an open front, and an eyelid option is available as shown opposite.

As standard, the luminaire utilises branded electronic control gear mounted on a white powder-coated metal gear tray. Black and Silver options available.

Typical Applications

High-Security Areas and External Lighting.

MPAK

Universal Retro-Fit LED Gear Tray
Solution for Bulkhead Luminaires

- // Mains and emergency versions
- // Optional microwave sensor for switching or dimming while unoccupied
- // CRI>80, 50,000 hour LED lamp life
- // Branded components
- // Hi-brightness charge healthy LED indicator
- // Fast fit push wire terminal block
- // Keyhole fixing points
- // Suitable for round or square bulkheads
- // 5-year warranty

Construction

Our LED gear tray has been designed to fully replace existing control gear within either round or square bulkhead luminaires when making the change from fluorescent technology to LED. Using this option removes the costly exercise of replacing the whole luminaire and the associated rewiring works. The gear tray is manufactured using white powder-coated sheet steel. As standard, our tray utilises branded electronic components and LED technology.

One of the advantages of using our retrofit gear trays as your light source is the assurance that all of the components are new within the fitting rather than simply replacing the lamp.

Typical Applications

Replacement of existing 2D Gear Trays.

MICRODETECT

Microdetect is a newer and more advanced Occupancy Sensor than the PIR. It works by emitting high-frequency electromagnetic waves and then receives their echo. The sensor detects the change in echo from the slightest movement in the detection zone, which commands a microprocessor to switch the light on.

MV-01

The MV-01 Microwave detector has been designed to be built into luminaires to provide on/off switching control.

Detection Field: Ceiling Mounted: 4m Radius at 5m mounting height.

Wall Mounted: 5m Radius at 5m mounting height

Switching Power Max. 400W (capacitive); Max. 800W (resistive)

Hold Time: 5s/30s/180s/300s/15min/25min, can be customised

Detection Area: 10/30/50/75/100%, can be customised

Detection Angle: 30 – 150 Degrees

IP Rating: IP20

MV-01-IP

The MV-01-IP Microwave detector is a standalone version of the MV-01 and is used for applications where a sealed detector is required. It is supplied within a circular housing which is suitable for direct mounting to a solid surface and has BESA box fixings for conduit applications.

Detection Field: Ceiling Mounted: 4m Radius at 5m mounting height.

Switching Power Max: 400W (capacitive); Max. 800W (resistive)

Hold Time: 5s/30s/180s/300s/15min/25min, can be customised

Detection Area: 10/30/50/75/100%, can be customised

Detection Angle: 30 – 150 Degrees

IP Rating: IP65

MICROWAVE DETECTION EXPLAINED

Microwave detection is a newer and more advanced occupancy sensor than the PIR. It works by emitting high-frequency electromagnetic waves and then receiving their echo.

The sensor detects the change in echo from the slightest movement in the detection zone, which commands a microprocessor to switch the light on. Some benefits of using microwave sensors over PIR are:

- Microwave sensors can be mounted inside most luminaires, therefore not compromising the IP (Ingress Protection) rating of the light unit.
- 16m coverage field – more than adequate for most internal applications.
- Fully adjustable in terms of light-linking, detection range and time-lag.

Typical applications for luminaires with built-in microwave detection:

- Stairwells
- Corridors
- Carparks
- Storerooms
- External lighting
- Office areas
- Toilets
- Classrooms
- Warehouse areas

Our range of bulkhead luminaires has been designed to be simple to install and is available in many LED, emergency and dimmable options. We can incorporate switching or dimmable microwave detection within all of our range of luminaires, providing optimum control of the luminaire, further enhancing the energy savings already available when using our LED range of luminaires.

EMERGENCY LUMINAIRES

CURVA

Curved LED Surface Exit Box

- // Maintained or non-maintained
- // Curved design
- // 25m viewing distance
- // Full three hour output in emergency mode
- // DALI version available
- // Arrow down legend supplied as standard

Construction

Our Curva exit sign is an aesthetically pleasing curved LED wall-mounted exit sign. The body of the luminaire is manufactured using white powder-coated sheet steel. The legend is manufactured using reflective polycarbonate sheet, which provides a high light output. Using LED technology as the light source this ensures the luminaire will be energy efficient with a long lamp life, durable and require little or no maintenance during the long lifecycle apart from the regular testing procedures and recommended emergency lighting maintenance procedures.

Typical Applications

Corridors, Stairwells, Reception Areas, Toilets, Exit Routes and General Office Areas.

Size Options

For optional features, please include the option code suffix with the product code when ordering.

SORTIE

Self-contained Emergency Exit LED Box

- // 34m viewing distance
- // Full three hour output in emergency mode
- // Maintained or non-maintained
- // Self-test version and remote control option available
- // Ceiling or recessed mounting
- // Low stand-by power consumption <0.5W (NM mode)
- // IP20
- // 5-year warranty (incl. battery)

Construction

The Sortie self-contained LED emergency exit box can be wired for either maintained or non-maintained operations. It has been manufactured to provide complete compliance to standards, including BS60598-2-22, and is IP20 and IK07 rated.

Self-test versions can be remote controlled to enable functional and duration tests on demand, check the status of the battery and programme automated self test at the required times.

The Sortie is manufactured using white powder-coated sheet steel, and the legend is made from polycarbonate sheet, which provides a high light output.

Typical Applications

Final Escape Routes including Corridors, Stairwells, Reception Areas, Toilets, Exit Routes, Warehouses and General Office Areas.

RAZOR

Surface LED Drop Legend

- // Maintained or non-maintained
- // Variety of finishes
- // 25m viewing distance
- // Double-sided legends
- // Full three hour output in emergency mode
- // Surface, suspended and wall mounting options available
- // Special legends made to order
- // Low power consumption
- // DALI version available

Construction

Our Razor exit sign has been designed to be a stylish LED exit sign with a drop-down legend. The body of the luminaire is manufactured in a brushed aluminium material and is supplied in this finish as standard with a powder-coated white and matt aluminium or polished chrome available from stock with brass and black available to order.

The double-sided legend is manufactured using a crystal clear acrylic panel, which provides even light distribution and excellent visibility. Using LED technology as the light source this ensures the luminaire will be energy efficient with a long lamp life, durable and require little or no maintenance during the long lifecycle apart from the regular testing procedures and recommended emergency lighting maintenance procedures.

Typical Applications

Corridors, Stairwells, Reception Areas, Toilets, Exit Routes and General Office Areas.

- // DALI version available

Construction

Our Recessed Razor exit sign has been designed to be a stylish flush mounted LED exit sign with a drop-down legend. The body of the luminaire is manufactured using white powder-coated sheet steel. The double-sided legend is manufactured using a crystal clear acrylic panel which provides even light distribution and excellent visibility.

Using LED technology as the light source ensures the luminaire will be energy efficient with a long lamp life, durable and require little or no maintenance during the long lifecycle apart from the regular testing procedures and recommended emergency lighting maintenance procedures.

ELD3

3W LED High-Output Recessed
Emergency Solution

- // Life PO4 battery pack
- // Non-maintained
- // Full three hour output in emergency mode
- // 150 lumens output
- // DALI and self-test options available
- // Corridor and open area lens options
- // Low brightness LED status indicator
- // Simple recessed mounting of combined luminaire and driver
- // SELV (Safety Extra Low Voltage)
- // LED head supplied in white as standard, other colours available

Construction

Our ELD3 has been designed as a discreet standalone low-maintenance emergency lighting solution when using decorative luminaires or when there is a requirement for a standalone system. The ELD3 consists of an LED lamp head with an integrated battery, status display LED and an emergency inverter unit to operate the single LED in non-maintained mode. The integrated self-test function corresponds to the European standard. Corridor or open-area lens options are available.

Typical Applications

Corridors, Stairwells, Reception Areas, Toilets, Exit Routes and General Office Areas.

ELW3

3W LED Recessed Emergency
Solution

- // 3 hour non-maintained LED head
- // Supplied with white bezel as standard with black bezel included in pack
- // Discreet design fits through 35mm cutout, only 43mm overall diameter
- // Flexible slim line battery pack - ICEL TS06 compliant
- // Full output in emergency mode
- // 138 lumens output

Construction

The ELW3 has been designed as a discreet standalone low maintenance emergency lighting solution when using decorative light luminaires, or there is a requirement for a standalone system. This utilises a two-part control gear system which includes a flexible battery pack with plug-and-play connectors and is designed to fit through a 35mm cutout. The 3W LED head is supplied as standard with a white detachable bezel with a black option included. The LED devices include a Bi-Colour LED indicator, green for mains operation and white for emergency operation.

Typical Applications

Corridors, Stairwells, Reception Areas, Toilets and General Office Areas.

SURFASPOT

2W LED Surface Emergency Solution

- // Surface or recessed mounting
- // Non-maintained with integral self-test facility or DALI from a single product
- // White fire-retardant plastic housing
- // Full three hour output in emergency mode
- // Low-maintenance - no lamp replacement required
- // Long life Lithium-ion battery

Construction

Our SurfaSpot has been designed as a surface or recessed self-contained 3W low-maintenance emergency lighting solution making it the ideal product when using decorative light luminaires which cannot be converted, or a surface fixed unit is required on a solid ceiling. The surface or recessed fire retardant enclosure houses the “intelligent” pro series DALI/Self-Test LED driver and a Lithium-Ion Phosphate (LiFe) battery. A Nichia 3-watt high power white LED in the fascia plate in conjunction with a choice of wide angle or a corridor distribution lens.

Typical Applications

Corridors, Stairwells, Reception Areas, Toilets, Exit Routes and General Office Areas.

SURFASPOT-ECO

3W LED Surface Emergency Downlight

- // Surface mounting
- // 3 Hour non-maintained
- // Lithium-ion battery
- // Open area or corridor lens options
- // BESA box mounting plate available
- // 165 Emergency lumen output
- // IP65 Housing available
- // 5-year warranty

Construction

Our Surfaspot Eco is housed in a polycarbonate enclosure with a snap-in fixing base plate for ease of installation. Finished in either white or black, there's an option to blend in with any exposed ceiling installation. An ideal standalone solution where luminaires aren't available as emergency versions.

Typical Applications

Final Escape Routes including Corridors, Stairwells, Reception Areas, Toilets, Exit Routes, Warehouses and General Office Areas.

BRICK

4W LED IP65 Emergency Bulkhead

- // Maintained or non-maintained
- // Supplied with self-adhesive legend kit
- // Low stand-by power consumption <0.5W (NM mode)
- // Full three hour output in emergency mode
- // Can be recessed and ceiling or wall mounted
- // Self-test versions and remote controls available
- // Hinged gear tray
- // 5-year warranty (including battery)

Construction

The Brick emergency LED bulkhead has been designed as a direct replacement for T5 8W bulkheads. It has been manufactured to provide complete compliance to standards including BS60598-2-22 and is IP65 and IK10 rated.

Self-test versions can be remote controlled to enable functional and duration tests on demand, check the status of the battery and programme automated self test at the required times.

CASAMBI LIGHTING CONTROL

CASAMBI LIGHTING CONTROL

Wireless Lighting Control System

- // Programming via intuitive Casambi app
- // No reliance on expensive third party providers or ongoing licensing
- // Distributed wireless mesh technology reduces plant room space, cabling cost and installation time on-site
- // Control hierarchy with timers, sensors and automation allows improved energy efficiency
- // Third party luminaires can be controlled alongside Casambi-native products
- // Wireless and wired wall switches available
- // One-touch scene selection
- // Scene setting can be programmed as desired to suit any mood or time of day
- // Dimming and colour temperature options available, including RGBW colour selection

Luminaire Integration

We can build the Casambi wireless control unit into most of our luminaires, ready for easy site installation. The Casambi lighting control system supports presence detection and can be configured with wireless wall switches for ease of installation. The Casambi lighting control solution allows for simple scene control via iOS smartphones, tablets and Android devices and is free to download by any end-user.

A2D

ASD

PWM4

TED

Typical Applications

General Office Areas, Conference Rooms, Reception Areas, Educational Facilities, Museums, Theatres, Retail Units, Hotels, Bars, Restaurants, Leisure Facilities and Residential Properties.

App

Casambi lighting control means that your luminaires are always at your fingertips to give illumination just the way you want it. From dimming to colour temperature control, you have full control with just a touch.

Casambi is a smart wireless control unit system for lighting that can use existing switches and wiring to give you complete control over your luminaires in a simple way. All you need is a smartphone or tablet to get the lighting to the exact style you want it.

CONVERTA SL LED

MNT/240/14/SP

Emergency Kit for Constant Current LED Lamp

- // Suitable for use with standalone constant current LED lamps
- // Fits through 60mm ceiling cutouts
- // Non-maintained suitable for mains LED drivers
- // Approx 3W output in emergency
- // Suitable for LEDs operating between 6-55V

Emergency Kit for Mains LED Lamps

- // Suitable for most mains GU10 LED lamps
- // Fits through 60mm ceiling cutouts
- // Maintained or non-maintained operation
- // 100% output in emergency
- // Plug and play battery connectors
- // 10 cell battery pack - ICEL TS06 compliant
- // Pre-wired flying loom for fast installation
- // Works with dimmable lamps

Construction

Our Converta SL LED emergency pack is designed to be installed by breaking into the low-voltage connection between the mains LED Driver and the LEDs. This will allow the LEDs to be operated normally under mains healthy conditions and at a reduced light output in emergency mode. The inverter is housed within a plastic enclosure with strain relief covers either end. The remote battery housed in protective sleeving is connected via male/female AMP plug connectors.

Typical Applications

LED Downlights and Panels with Standalone Constant Current Drivers.

Product Code	Emergency Type
SLE3/KIT	Non-maintained
Can be wired as Maintained with suitable LED driver	

Dimensions
Fits through 60mm Ø cutout

Construction

Our MNT/240/14/SP emergency kit is designed to provide 100% emergency backup when using mains GU10 LED lamps. This is achieved by providing the pack with a 240V AC supply which is converted to DC voltage in emergency mode to power the lamp.

The inverter is housed in a metal enclosure and batteries are housed within a flexible sleeve which has been designed to be installed through a 60mm cutout as standard. To ensure simple installation, the pack is pre-wired with a mains connection lead, lamp connection lead and plug and play battery connectors.

The pack will work with dimmable lamps and other mains LED lamps subject to the compatibility of the electronics.

Typical Applications

Mains GU10 LED lamps.

Product Code	Emergency Type	LED Wattage
MNT/240/14/SP	100%	8W Maximum

Dimensions
Fits through cutout Ø 60mm

Universal Retro-Fit LED Gear Tray
Solution for Bulkhead Luminaires

- // Mains and emergency versions
- // Optional microwave sensor for switching or dimming while unoccupied
- // CRI>80, 50,000 hour LED lamp life
- // Branded components
- // Hi-brightness charge healthy LED indicator
- // Fast fit push wire terminal block
- // Keyhole fixing points
- // Suitable for round or square bulkheads
- // 5-year warranty

Construction

Our LED gear tray has been designed to fully replace existing control gear within either round or square bulkhead luminaires when making the change from fluorescent technology to LED. Using this option removes the costly exercise of replacing the whole luminaire and the associated rewiring works. The gear tray is manufactured using white powder-coated sheet steel. As standard, our tray utilises branded electronic components and LED technology.

One of the advantages of using our retrofit gear trays as your light source is the assurance that all of the components are new within the fitting rather than simply replacing the lamp.

Typical Applications

Replacement of existing 2D Gear Trays.

Size Options

MNT/240/40

Emergency Conversion Kit for Mains Voltage Lamps

- // Entire unit is housed in one steel hinged enclosure
- // IP20
- // Supplied complete with high-capacity VRLA batteries
- // Deep discharge protection
- // 3 hour emergency duration
- // 24 hours charge time
- // Converts loads up to 40W

Construction

Our MNT/240/40 is a 3 hour emergency lighting conversion pack, which has been designed specifically to suit a multitude of mains voltage lamps with a maximum load of 40W.

The inverter module and batteries are housed within a sheet steel enclosure with a hinged lid to aid access to the wiring connection points and fused terminal. Using the keyhole slots, the pack can be fixed directly to a solid surface to ensure a neat installation is achieved.

The MNT/240/40 is supplied as a remote conversion kit for mounting away from the fitting. It is suitable for 230V DC loads.

Typical Applications

This pack will work with a multitude of mains LED lamps subject to compatibility of electronics.

Size Options

Size
L 380mm W 242mm H 90mm

Please ensure that your lamp/luminaire is capable of being powered by DC.

Typical lamp - 230V 40W max.

Product Code	Power Output (Emergency Mode)	Wattage	Weight
MNT/240/40	100%	Up to 40W	9kg

MNTLV24

Emergency Kit for 24V Tape

- // Complete kit is housed in one steel hinged enclosure
- // IP20
- // Supplied complete with high-capacity VRLA batteries
- // Deep discharge protection
- // 3 hour emergency duration
- // 24 hours charge time

Construction

Our MNTLV emergency pack is designed to provide full output in emergency mode and, where required, normal mains lighting via an integral or remote low voltage transformer. The electric transformer, inverter module, 1mm green charge healthy indicator and batteries are housed within a sheet steel enclosure with a hinged lid to aid access to the wiring connection points and fused terminals. Using the keyhole slots, the pack can be fixed directly to solid surfaces to ensure a neat installation is achieved.

The pack is for the use of 24V lamps supplied at 100% power output. Supplied as Non-Maintained as standard but can be used in conjunction with the existing mains transformer to form a maintained circuit.

Typical Applications

24V LED tape

Size Options

Size

Aluminium profiles and drivers are not included and can be ordered separately.

LED STRIP TAPE DRIVERS

Mount Lighting offer a selection of LED drivers from the Mean Well and Ecopac brands providing quality solutions for LED tape. The range of drivers is equipped with various options, including dimming, dual mode constant voltage and constant current output. Various IP protection levels allow for both indoor and outdoor applications.

Casambi-enabled drivers for constant current and constant voltage loads are also available. Please enquire at sales@mountlighting.co.uk or call 01582 369 005.

DALI Dimmable

24V Constant Voltage & Current LED DALI

- // 24V standard, 12V available
- // Various wattages available
- // IP65 & IP67 options
- // Typical lifetime >50,000hrs
- // 5-year warranty

Product Code	Function	IP
ELG-200-24A-3Y	200W 24V Constant Voltage & Current LED PSU 6.25A	65
ELG-200-24DA-3Y	200W 24V Constant Voltage & Current LED DALI Driver	67
ELG-150-24A-3Y	150W 24V Constant Voltage & Current LED PSU 6.25A	65
ELG-150-24DA-3Y	150W 24V Constant Voltage & Current LED DALI Driver	67
ELG-100-24A-3Y	100W 24V Constant Voltage & Current LED PSU 6.25A	65

24V Constant Voltage Non-Dimmable LED Driver with Fly Leads

Aluminium profiles and LED tapes are not included and can be ordered separately.

LED STRIP TAPE PROFILES

Mount Lighting advise when using LED strip tape, you use suitable aluminium profiles with a diffuser for mandatory dissipation and even light distribution. Fixing the LED tape to the extrusion can create a finished look compared to the unhoued tape, especially when clearly visible. The profiles are not waterproof but can help prevent moisture ingress, for full protection, use IP67 tape and driver. **LED tapes and drivers are not included and can be ordered separately.**

Interpretation

- a) In these Conditions, ‘the Company’ means Mount Lighting Ltd or any subsidiary company or agent authorised by them and means the person or persons firm or company purchasing from or doing business with the Company.
- b) ‘the Goods’ means all products supplied by the Company to the Purchaser, whether by means of sale, hire, rental or otherwise and whether the property of the Company or distributed by the Company as agents for another.

General

- a) These conditions of Sale should be read in conjunction with any Special Conditions included in the Company’s quotations.
- b) The Company reserves the right to accept or refuse any order given on the basis of its quotations and in the event of the refusal of any order, no damages or expenses of any kind shall be payable by the Company.
- c) Quotations and offers are given and contracts of sale are only accepted subject to these conditions. Any variation thereof by the Purchaser will be treated as inapplicable and of no effect, unless specifically agreed in writing by the Company.
- d) Any complaint about the goods supplied, damage in transit or short delivery shall only be entertained by the Company if made within 3 days of date of delivery to the Purchaser.

Prices

- a) Printed price lists are subject to alteration without notice by the Company.
- b) Orders are accepted at net selling prices ruling on the date of delivery by the Company.

Payment

- a) Payment of all goods shall be ‘Cash on delivery’ until account facilities have been granted by the Company to the Purchaser whereby all monies owing in the current month by the Purchaser to the Company must be received by the Company before the last day of the following month.
- b) If payment is delayed beyond the agreed terms, the Company reserves the right to charge a surcharge of £3.50 per week or part thereof and interest of 0.8% per week on the outstanding balance.

Property

- a) The Company and the Purchaser expressly agree that until the Company has been paid in full for all goods, such goods shall remain the property of the Company but being at the risk of the Purchaser as from the date of delivery and the Purchaser shall hold them as bailee. If the Purchaser sells the goods before payment in full has been made and if the Company requires he shall hand over to the Company all claims for payment against the sub-purchaser. So long as the property in the goods remains in the Company, the Company shall have the right, without prejudice, to the obligation of the Purchaser, to purchase the goods, to take re-possession of the goods and for that purpose to go upon any premises occupied by the Purchaser. The Company may maintain an action for the price of the goods, notwithstanding that property in the goods may not have passed to the Purchaser.
- b) Goods paid for but not collected will become the property of the Company after three months and the Company may dispose of goods as seem fit.

No Cancellation

- a) There can be no cancellation or return of goods by the Purchaser without the Company’s written consent.
 - b) Non-stock items or goods ordered by the Purchaser which involve the Company ordering in items or goods specially or manufacturing items, especially for the Purchaser cannot be cancelled by the Purchaser once work is in progress or goods bought in by the Company. The Purchaser must accept and pay for goods (if tendered for delivery) on the contractual date.
- Returns**
- a) Purchasers wishing to return goods for whatever reason must first negotiate terms with the Company. Dependant on the goods and the basis of return, a handling charge may apply. All returns notes must include the Company’s invoice reference or Purchaser’s original order reference to ensure no delay occurs.
 - b) The Company will not replace goods claimed to be defective until it is confirmed the fault is not the result of improper use or installation, and in any event, the decision of the Company about any alleged defect shall be final and conclusive.

Minimum Order

The minimum invoice value is £25 net, excluding VAT.

Delivery

- a) Delivery is free on orders over £250 or above net invoice value excluding VAT within mainland Britain. For other areas carriage will be charged at cost.
 - b) Any times quoted by the Company for despatch or delivery are estimates only, and the Company shall not be held liable for any loss, consequential loss or chargeable waiting time of any description by any delay in delivery, howsoever caused whether directly or indirectly.
- Loss or damage in transit**
- a) Any shortage or damage must be clearly stated upon the driver’s Delivery Sheet and a written statement of the facts received at our branch and by the Carrier (if not ourselves) within 2 days of the date of delivery, otherwise, no claim will be entertained. The package and contents should be retained for examination.
 - b) Written notice of any non-delivery must be received at our branch within 7 days after the date of the invoice. Time is of the essence of this clause. Our liability in respect of any claim accepted under this Clause is limited to making up the shortage or replacing any goods proved to have been damaged or lost in transit to the point of delivery, and we accept no liability for any loss or damage suffered by you, whether direct or consequential and howsoever arising.

Indemnity

- a) The Company shall not be responsible for any consequential loss of any description incurred by the Purchaser as a result of any failure or fault in the Goods or for any damages or personal injuries or other losses, howsoever caused directly or indirectly by the Goods.
- b) The Company shall pass onto the Purchaser the benefit of any Guarantees or Warranties provided by the manufacturers of the Goods and any rights vested in the Company under such Guarantees or Warranties are hereby assigned to the Purchaser but without prejudice to the previous sub-clause.
