

MNT/240/20/R

Remote Emergency Pack

- // Entire unit is housed in one steel enclosure
- // IP20
- // Supplied complete with high-capacity LiFePO4 batteries
- // Deep discharge protection
- // 3 hour emergency duration
- // 24 hours charge time
- // Converts loads up to 20W

Construction

Our MNT/240/20/R is a 3 hour emergency lighting conversion pack which has been designed specifically to suit a multitude of mains voltage lamps with a maximum load of 20W.

The inverter module and batteries are housed within a sheet steel enclosure with a lid to aid access to the wiring connection points and 4-way terminal. The pack can be fixed directly to a solid surface to ensure a neat installation is achieved.

The MNT/240/20/R is supplied as a remote conversion kit for mounting away from the fitting. It is suitable for 230V DC loads.

Product Code	Power Output (Emergency Mode)	Wattage	Weight
MNT/240/20/R	100%	Up to 20W	1.65 kg

Typical Applications

This pack will work with a multitude of mains LED lamps subject to compatibility of electronics.
