

## ELX3

### 3W LED High-Output Recessed Emergency Downlight

- // All-in-one LED emergency downlight with removable ceiling bezel, available in two sizes, 55mm and 80mm
- // LiFePO4 6.4V 1500mAh battery pack
- // Non-maintained
- // Full three-hour output in emergency mode
- // DALI, will operate as self-test when DALI not connected
- // Corridor and open area lens options
- // LED head supplied in white as standard, black option available
- // Modular pluggable design, allowing replacement of each element easily
- // 3-year warranty

### Construction

Our ELX3 has been designed as a discreet standalone low-maintenance emergency lighting solution when using decorative luminaires or when there is a requirement for a standalone system. The ELX3 consists of an LED lamp head with an integrated battery, status display LED and an emergency inverter unit to operate the single LED in non-maintained mode. Corridor or open-area lens options are available.

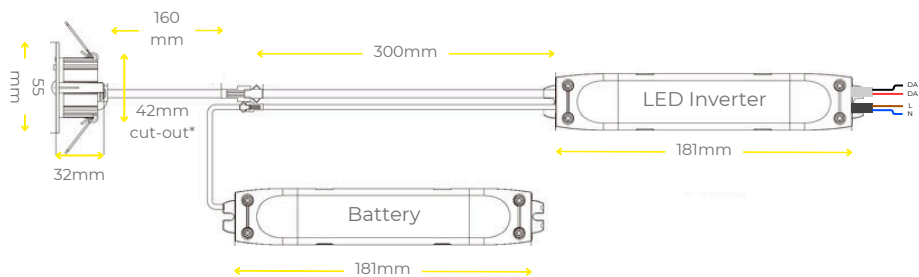

Product Code	LED Wattage	Lumen Output	Wattage under EM	Colour Temperature
