

CASAMBI LCM

Plug. Control. Done.

Wireless-ready, rapid
rollout luminaire
control from Mount
Lighting.

WHAT IT DOES BEST

- 1 Plug-and-Play Simplicity**
Luminaires prewired with industry-standard connectors. No on-site terminations. Fast and clean.
- 2 Casambi Control, Built In**
Wireless control embedded from the start - no extra gateways, no complex commissioning.
- 3 Emergency Test Ready**
Dedicated keyswitch channel for simple emergency lighting testing.
- 4 Flexible Outputs**
12 output channels with up to 6A each. Works with DALI luminaires and Casambi sensors.
- 5 Compact & Tough**
Slim, moulded polycarbonate housing, designed for quick single-fix installation.

LIGHTING INSTALLATION. SIMPLIFIED

Lighting systems are often overcomplicated. The MLCM module strips away the faff - just plug in your luminaires, power it up, and you're good to go. Wireless Casambi control is built in, so it just works out of the box.

Add layers of control hierarchy if you want to, but that's optional.

PERFECT FOR

Office fit-outs, fast-track refurbishments, modular builds

SPECIFICATION HIGHLIGHTS

Max Load: 12A (6A per channel)
Prewired 6-pole connectors (sensor or luminaire on any channel)
Flame-retardant housing (UL94 V0)
Supports 230V single-phase only
Made in Great Britain

ACCESSORIES

We also supply prewired luminaire leads, emergency versions, and PIR sensors—all plug-and-go.

CONFIGURATION OPTIONS

MLCM12 - 12 output, pluggable, with Casambi sensor master control
MLCM12C - 8 DALI groups, up to 40 luminaires
MLCM12D - Individual dimming for up to 16 DALI luminaires
All models compatible with CBU-PIR Casambi sensor modules (3m or 5m leads).
