

ELX

3W LED High-Output Recessed Emergency Downlight

- // All-in-one LED self test emergency downlight
- // Removable ceiling bezel, available in two sizes, 55mm and 80mm
- // LiFePO4 6.4V battery pack
- // Non-maintained
- // Full three-hour output in emergency mode
- // DALI option will operate as self-test when DALI not connected
- // Corridor and open area lens options
- // LED head supplied in white as standard, black option available
- // Modular pluggable design, allowing replacement of each element easily
- // 3-year warranty

Construction

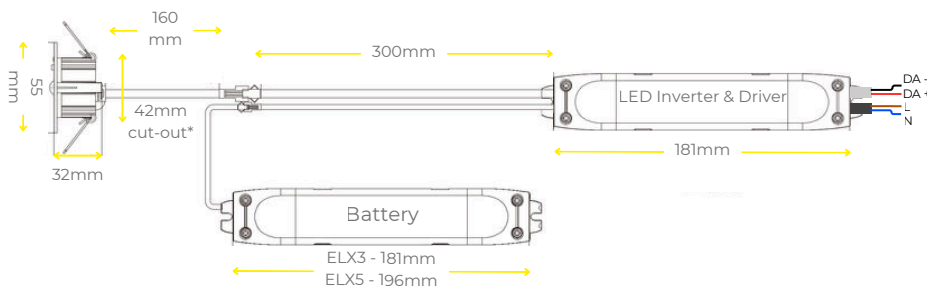

The ELX is a standalone, non-maintained LED emergency downlight for use with decorative luminaires or where a dedicated emergency lighting solution is required. It consists of an LED lamp head with a status display LED indicator and an emergency inverter unit to operate the single LED from a remote battery.

The ELX delivers a full three-hour emergency duration and features automatic self-test functionality as standard. A range of bezel sizes, finishes and optical distributions, including corridor and open-area lens options, provides flexibility across a variety of installation requirements.

Typical Applications

Corridors, Stairwells, Reception Areas, Toilets, Exit Routes and General Office Areas.

Dimensions

*Cut-out size if using extra bezel is 66mm

Product Code	Mains Power	Lumen Output	Wattage under EM	Colour Temperature
ELX3	3.5W max	260	2W	5000K
ELX5	3.5W max	400	4.5W	5000K

Product Configuration

Choose your options to generate the full order code

Section	Option Code	Description
